Despite decades of activism by feminists and their allies, women and their children continue to be subjected to family violence, including intimate partner violence (IPV) and femicide, in shocking numbers. Why have we failed to respond effectively to a social problem that affects millions of women and children?

Pamela Cross provides an in-depth look at IPV in Canada in her book ***And Sometimes They Kill You***. Told in an engaging and accessible fashion, it weaves together Cross's personal experiences and reflections with the powerful stories of victims, survivors, and the alarming but convincing data.

This is a call to action for the all-of-society, revolutionary response to gender-based violence needed to build communities that are safe and healthy for everyone.
